

N#NA#AM#ME#E

This is a demonstration client-server architecture

S#SY#YN#NO#OP#PS#SI#IS#S

client [port ip] server [port]

D#DE#ES#SC#CR#RI#IP#PT#TI#IO#ON#N

client sends requests for transactions. server accepts requests and process the transactions.

A#Ar#rg#gu#um#me#en#nt#ts#s

port This is the port number that requests will be sent to.

ip This is the ip address of the server.

F#FI#IL#LE#ES#S

source files are client.cpp and server.cpp
